1. It is requested that [REDACTED] attempt to discover the services using, and where circuits are operated, for the [REDACTED] and [REDACTED] block from which our Washington base calls have been issued. In addition, it is requested that he determine whether or not it will be possible for us to procure at least one, and preferably two, call signs which are completely dissimilar to the [REDACTED] series. Such dissimilar call sign(s) are required in order to keep our European/Middle Eastern circuits untainted from our Latin American circuits which, as you know, are presently operating with [REDACTED] call signs.

2. It is further requested that current information on the [REDACTED] radio teletype circuit be obtained. It is desired by this office to be informed of the hours of operation and frequencies on which [REDACTED]

3. It is further requested that [REDACTED] determine whether or not it will be possible for a communications officer for the Near East net to administer and proctor commercial radiotelephone First Class and Radioteletype Second Class examinations to those personnel assigned to the net who are interested in taking such examinations.
